IF We this morning submit to our readers a specimen of the ENLARGED DAILY TRIBUNE, but we beg them to consider it a specimen in size only. We have not been able to throw out all the old type, and shall not be for two or three days to come; but we hope to have room at once to pub lish a greater variety and amount of matter fo our Readers, and at the same time render more perfect justice to our numerous Advertisers, many of whom we have of late been obliged to slight. or else send our paper to press with nothing in it but Advertisements. Henceforth, we hope to have room as well as welcome for all.

We improve this occasion to return our unfeign ed thanks to the Public for the large and steadily increasing patronage which enables and almost compels us to make this Enlargement. Our gratitude is the deeper from our knowledge that many of the views expressed through our column unacceptable to a large proportion of ou readers. We know especially that our advocacy of measures intended to meliorate the Social condition of the Toiling Millions, (not the purpose but the means,) our ardent sympathy with the People of Ireland in their protracted, arduous. penceful struggle to recover some portion of the common Rights of Man, and our opposition to the legal extinction of Human Life, are severally or collectively regarded with extreme aversion by many of our steadfast patrons, whose liberality and confidence is gratefully appreciated.

To the Whig Party, (of which we profess to be no 'organ,' but an humble advocate,) our obligations are many and profound. Its generous support has enabled us to establish and render profitable The Tribune with a smaller original outlay of Capital and Exertion than has been supposed indispensable to the outset of a permanent Daily Journal. Usually, several years and at least one fortune have been required to attain a position of safety and remuneration. The Tribune may be said to have been successful from the outset-at any rate, from the close of its first year. And may we not, on this occasion, without un-

riends on the radiant aspect of the Political hori ton? If we are not greatly mistaken, an overwhelming triumph is to be achieved by as in the approaching Presidential Election. Our confidence in this is not based merely on the cheering results from day to day transpiring all around us but on our conviction that the distinctive Meas ures of the Whig Party are such as must every day commend themselves more and more deeply, especially where earnestly and generally discussed, to the approbation and support of the American People. The elemental principles of the opposite party negative the idea of any active, positive beneficence in the purposes of Government. All their loud and incessant professions of devotion to the interests and elevation of the Masses, seem to end in the breath which gives them atterance; while the Whigs, with less volubility of pretension, are actively engaged in promoting or sustaining Measures, some of which are already effected and others are directly calculated to effect, important practical good. On the Tariff question, the Currency, the Land Distribution, and Internal Improvement, the Whigs occupy ground which every year's experience and discussion must render stronger and stronger with the People, until the policy they uphold shall have ceased to be opposed or control verted. Rejoice with us, Whig friends! and join in putting aside all irrelevant, erratic Political action, until the triumph of 1844 is secured !

IT WHIGS OF ALL THE WARDS! WE DIEST you! This is an hour which tries windy professions which removes the gloss from sunshin-Patriotism. The crisis tests who works for the Cause, and who for himself. We offer you no plunder of the City-we do not promise you victory. We only say, It is essential to the stability of the Whig Party, to the triumph of HENRY CLAY, that a good rate be polled for the regular Whig Candidates to morrow. Now let those who love the Whig cause for its own sake, and not for the loaves and fishes, redouble their exertions. Let us have out every purely Whig vote to. morrow!

Important from Washington.

Recent advices from private but well informed source assure us of the following important facts,

1. That John Tyler has definitively determined to stand as a candidate for President, on independent grounds ;

2. That a Convention of his friends will assemble in Baltimore on the 27th of May, and be his Vice President 1

3. That he will run as the open, avowed advocate of terminating directly the Joint Occupation People for support.

Adopted Citizens!

No matter of what party! It is reported that ome of you will engage in riots to-morrow, and even commence bostilities against those who style themselves American Republicans.' Any of you who do so, will prove yourselves enamics f Human Freedom, and traitors especially to the interests and rights of the thousands who are anmually escaping to this Land of Liberty from the oppression of despots. You must not, dare not wit! Go to the Polls to morrow and vote for whatever candidate or party you may severally prefer, assert your rights as Freemen, but never enable your adversaries to charge on you not and disorder, should such unhappily occur. Do not pretend to be afraid that your Political Rights are in danger-they are safe against any aggression but from you. This 'Nutive' array can last but for a moment-success or defeat alike ensures its dispersion. Nothing of the sort can endure in a Free Country, except by the misconduct of these countryman at the polls with a weapon or staff, persuade him, if possible, to take it home immediately. Remember, that the only FORMIRABLE enemies of your Rights are those who would iacite you to abuse them.

I Whigs of the SECOND WARD! Is it possible that you will be conquered by your old adversaries? The 'Native' ticket has not the ghost of a chance, but if one third of you vote it, the Locus have the Ward! Do you mean this? If not, rally in your strength, vote the good old ticket, and sustain the good cause.

To The Whies of the THED, NINTH and THIRTEENTH WARDS will hold Mass Meetings at their several Head Quarters this evening. Come out, Whigs! and show that you are not 'blown about by every wind of doctrine, but remain two, three and four majority, respectively-9 faithful to your Cause and your Country! See

The Noble Fifteenth.

Is it possible that this glorious Whig Ward. which has never faltered, is now about to desert the Whig Standard ! It must not, cannot be this Fall, and should give carnest of her ability have all Whigs . Has you present worthy Alderman ever proved unfaithful . Has he upheld corruption or favoritism? No! No! You are ours below not! Then resolve that he shall not be defeated, and see your Whig friends on the The following Circular has just been ssued by your Ward Committee :

This s sensible advice. We did not expect this move

ment to commence till after the Charter Election

It is the daily assertion of the Loca-Focos thu the 'American Republican' party is a Whig movement-an offshoot from the Whig party.-The facts give the lie to this-It is purely Loco Foco in its origin, and grew out of quarrels and heart burnings arising from the division of 'the Spoils' last Spring, when the Locos returned to sower. The 'Native' vote last Fall came more than half from the Loco. Focos. We ask no man to take our word for this, but to examine the following comparison of the vote last Fall with that of the preceding Spring in the several Wards.-That tells the whole story as the falling off i the Loco and total vote exposes the abominable fraud and double voting practiced last Spring, and shows which party was guilty of it:

Texas Annexation Meeting Another Failure — A Vote of Tranks to John Tyler refused.

Correspondence of The Tranks. April 584

Agreeably to a call published in the various papers, an adjourned meeting of the friends of the Reers, an adjointed meeting of the friends of the Re-The latt for the relief of one of your suffering In

Annexation of Texas to the United States was held last evening at the County Court House, the pro-Esq. the eloquent orator, would address the meeting, many persons were present out of mere curiosity, to hear the argument of so emment a speaker in favor of Amexation, knowing full well that Mr. Brown was an Abolitionat and heartily opposed to the existence of Slavery in any form. ing, many persons were present out of mere currous its, to hear the argument of so emment a speaker in favor of American, knowing full well that Mr. Brown was an Abolitionist and heartily opposed to the existence of Slavery in any form. For my own part, I knew his name was only made use of or officiel, and no doubt without his consent.

About Litera minutes to Sociole's, Col.C. J. Jack called the meeting to order by nominating FREDSE-life Storyke Chairman, Mr. Caldwell, Mr. Ford, and Col. Win. Dickson, Vice Presidents, and James McCurshan, Secretary. Mr. Caldwell declined serving.

The President, in a few words, stated the object of the meeting, when Col. Jack—the "great gun" of Annexation, or rather re-American in this city-rose, and said that "some how or other, the duty of leading in this matter had fallen upon him, and delicate as it seemed, he would not be deterred by any thing that meth the said against him, but intended to move innawed in the matter." A long series of resolutions, giving minerous reasons why Texas should be american resolution of the Col. were then read, after which is speech to anchow and fifteen minutes followed. It was a curious affair, neither one thing nor the other, and filled with numerous radiculous and files statements. Lengthy extracts were read from Mr. Walker's pamphlet, and John Quiney Adams frequently referred toas having contended that Texas properly belonged to the United States, having, in the purchase of Louisman, seen coded to the American People. The Colonel was very severe upon the Editor of the New-York American, and in the course of his publipper, very indignantly exchanged.

speaks of a Dissolution of the Union" (Great sensition and applause.) The speaker alluded to the vast benefit. Annexation would be, in particular to Pennsy lyanina, as Texas possessed no coal mines of grown and Wheat. Consequently, she must seek our markets to supply her demands. But I cannot follow the speaker farther, who was certainly very enthusiassic in his advocacy of the re-Annexation of Texas to the United States.

Inneclately after Mr. Jack had comeluded, a young mun rose, denied his statement relative to coal and wheat, and appealed to gentlemen present, who were just from Texas, to prove that coal had been found upon the Colorado, and wheat was grown to a considerable extent.

Several persons now attempted to speak, when the cry of "Not an Abolition question," was heard, —the vote upon the resolutions demanded,—an typical content of the most considerable extent.

amendment offered, togething the suppression of Slavery—when finally the resolutions were again read by Col. Jack, and adopted with but one dissenting two cer.

At this stage of the proceedings, a respectable booking man, who attempted several times to address the meeting, rose and said—"I now give notice that a meeting will be held in this place, when the question of Amexation can be fairly described." For a moment or two there was considerable sensation, and the words "Aboliton," "Slaves," &c. were been sucken by several.

Here was a fire-braid at once, and Col. Jack, who had previously denounced John Tyler, spring to his feet, desired the resolution separated, declaring he would oppose any vote of thanks being tendered to the President, as he could find no official act of his neering the same! He called upon Mr. Dickson to point out such act—Mr. Tyler deserved but little, in his estimation, at the hands of the meet.
